Number Concept

Sub Strand:

Position of objects in number symbols

Specific Learning Outcomes:

By the end of the lesson, the learner should be able to:

- Use ordinal number names to identify positions from 1 to 20 in words.
- Make posters showing ordinal numbers up to twentieth.
- Appreciate the importance of numbers in real life.

Key Inquiry Question(s):

- How do you identify position of rally cars in a competition?

Core Competencies, Values, and PCIs:

Core Competencies	Values	PCIs
Communication and collaboration Critical thinking and problem solving	Unity Respect	Health education (physical fitness through outdoor running activities)

Learning Resources:

- Number cards
- Felt pens, books, and playground
- KLB Lower Primary Mathematics Pupil's Book 2 pg. 217

- KLB Lower Primary Mathematics Teacher’s Guide Grade 2 pg. 1-4

Organization of Learning:

Introduction (5 minutes):

- Ask learners how race winners are announced in a sports day event.
- Introduce the concept of positions using ordinal names (first, second, third).

Lesson Development (25 minutes):

- **Step 1:** Guide learners outdoors to conduct a short running race.
- **Step 2:** Assist learners in assigning finish positions using ordinal names from first to twentieth based on completion order.
- **Step 3:** Guide learners to write down their race positions using both number symbols (1st, 2nd) and words (first, second).
- **Step 4:** In small groups, have learners create simple posters displaying ordinal numbers from first to twentieth.

Conclusion (10 minutes):

- Review ordinal position names orally with flashcards.
- Summarize how positions help order items and competitors in daily life.

Extended Activities:

- Learners to list the birth order positions of their siblings or family members at home.
