LIVING THINGS AND THEIR ENVIRONMENT

Plants

Classification of plants

Plants are living things.

Classifications - is the act or the process of dividing plants in groups, according to the given features.

In grade 5 plants are grouped into two categories which include

Flowering plants - these are plants that produce flowers for examples maize, pawpaw and beans.

Non - flowering plants - these are plants that do not produce flowers for examples mosses, fern and algae.

Parts and functions of a flower

A flower is the reproductive part of a plant. Most flowers have both the male and the female reproductive parts. Some flowers have only one reproductive part, either the male or the female.
